Source: Bandcamp raw data reports exported October 10, 2026 from the label and artist tools. Purchases were matched by release URL and transaction ID. The published CSV contains financial fields for the release only and omits buyer contact details, payment identifiers and unrelated catalog sales.

Method: net income uses Bandcamp's "net amount" field. Revenue share is reconciled as buyer total less tax, processing and net income; payment fees are not subtracted twice. This report is based on sale dates rather than payout dates.
